Office Action Summary

Art Unit 1771

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. § 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ...". (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. § 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. § 101.

3. Claims 1-15 are rejected under 35 U.S.C. § 101 as claiming the same invention as that of claims 1-14 of prior U.S. Patent No. 6,235,386B1. This is a double patenting rejection.

4. Claims 1-15 are rejected under 35 U.S.C. § 103(a) as being unpatentable over either Williams -877 or Williams -971, each taken in view of Ohno et al., substantially for the reasons set forth in paragraph No. 6 of Paper No. 4, together with the following additional observations. Applicants have amended their claims so as to now define the plastic film as "oriented", as well as further define the lamination between the paper and the plastic film as "adhesively cold laminated". However, the first parameter is clearly shown by both primary references, and with respect to the utilization of "cold" lamination techniques, such a parameter is believed to be both well known to one of ordinary

Art Unit 1771

skill (note again Finestone et al., or GB -447) as well as being a product-by-process limitation not shown to produce a patentably distinct article. Applicants' arguments throughout their response appear to basically ignore the fact that the Examiner has relied upon a combination rejection, as well as further ignoring what is believed to be the high level of ordinary skill in the art. For example, with respect to their remarks in the paragraph bridging pages 2 and 3 of the response, note again that cold lamination is both strongly believed to be well known and within the skill of the art as cited by the two state of the art references. Additionally, with respect to their remarks (Response, page 5, first complete paragraph) concerning the precise time of when to use the process of employing corona discharge techniques, such a parameter is neither found to be in their claims as well as being an unsubstantiated product-by-process limitation not having been shown to produce an improved article, in addition to the Examiner's firm belief that such corona discharge treatments are well known to one of ordinary skill in the art.

5. Applicants' amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). The practice of automatically extending the shortened statutory period an

additional month upon the filing of a timely first response to a final rejection has been discontinued by the Office. See 1021 TMOG 35.

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
